

DEEPAK KUMAR

Full Stack AI Developer | Web Systems & Generative AI Engineering

Bahadurgarh, Haryana, India | +91 7404230481 | drai9813@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack AI Developer with proven experience architecting high-performance web applications and production Generative AI integrations. Skilled across Next.js 16, React 19, TypeScript, Node.js/Express, and modern LLM pipelines (Groq LLaMA 3.3, Claude API, Server-Sent Events token streaming, and RAG architectures). Demonstrated ability to deliver commercial client platforms from conception to cloud deployment with 98+ Google Lighthouse performance, zero downtime, and end-to-end type safety.

TECHNICAL SKILLS

AI & LLM Engineering: Prompt Engineering, Retrieval-Augmented Generation (RAG), Token Streaming (SSE), Function Calling, Groq API (LLaMA 3.3 70B), Anthropic Claude API, OpenAI API, Document Parsing (pdfjs-dist), Vector Search

Frontend Development: Next.js 15/16 (App Router), React.js (v18/19), TypeScript, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, Zustand, Radix UI, TanStack Query, Framer Motion, Responsive UI/UX

Backend & APIs: Node.js, Express.js, RESTful API Design, NextAuth.js, JWT Authentication, Server-Sent Events (SSE), Firebase Cloud Functions

Databases & Tools: PostgreSQL, MongoDB, Prisma ORM, Firebase Firestore, Git, GitHub, Docker, Postman, Vitest, Playwright, Vercel, AWS (EC2/S3)

WORK EXPERIENCE

Full Stack Developer | SAN Brothers Corporate Solutions (Client Contract)

Nov 2025 – Present | Bahadurgarh, India

React.js, Vite, Responsive Architecture, REST APIs, DNS/SSL Deployment | [Live Site: sanbrotherscorporatesolutions.in](https://sanbrotherscorporatesolutions.in)

- Independently architected, developed, and deployed the official production client web platform for a corporate compliance and legal advisory firm using **React**, **Vite**, and modern web standards.
- Engineered an ultra-fast, responsive UI featuring zero-gradient architectural aesthetics, dark/light theme persistence, asynchronous typography preloading, and dynamic SVG brand animations, achieving a **98+ Google Lighthouse score**.
- Designed robust lead-capture and consultation inquiry workflows with client-side validation, secure REST API integrations, and WhatsApp/Email routing for streamlined corporate client acquisition.
- Managed the complete project lifecycle from client requirement gathering and UI/UX design to DNS configuration, SSL certification, CDN edge caching, and automated deployment with zero downtime.

FEATURED PROJECTS

LeadFinder AI — AI-Powered B2B Lead Intelligence & Outreach Engine

github.com/deepakrai9813/leadfinder-ai

Next.js 16, TypeScript, Tailwind CSS, Prisma ORM, PostgreSQL, NextAuth.js, AI Scraping, TanStack Query

- Developed a full-stack AI lead-generation platform that identifies businesses lacking modern digital presence and automatically drafts personalized, high-converting outreach copy.
- Built intelligent website inspection and analysis pipelines using AI agents to evaluate business digital footprints and generate tailored email and WhatsApp campaign templates.
- Implemented secure multi-provider authentication (Google OAuth) using **NextAuth.js** and modeled relational data schemas with **Prisma ORM** and **PostgreSQL**.
- Engineered an interactive dashboard with **@dnd-kit** drag-and-drop workflow management, Radix UI primitives, and real-time campaign analytics.

BIAN AI — Multimodal AI Study Assistant & Real-Time PDF Tutor

github.com/deepakrai9813/AI_PROJECT

React 19, Vite, Node.js, Express 5, Groq API (LLaMA 3.3 70B), pdfjs-dist, Vitest

- Built an end-to-end full-stack AI study platform enabling students to upload multi-page PDF documents and interact with an AI tutor for grounded contextual Q&A, instant summaries, and interactive flashcards.
- Integrated the **Groq API** (llama-3.3-70b-versatile) with **Server-Sent Events (SSE)** to stream low-latency token responses directly to the client interface.
- Engineered a client-side document processing pipeline using **pdfjs-dist** to extract and inject structured text into dynamic LLM prompt contexts.
- Created automated 5-question multiple-choice quiz generators with instant feedback algorithms and interactive 8-card flip decks with quota-safe local storage persistence.

BookHaven — 13G Atelier Full-Stack E-Commerce & Interactive Canvas

github.com/deepakrai9813/BookHaven

React, Node.js, Express, REST APIs, HTML5 Canvas API, CSS3 Design System

- Architected a full-stack online literary platform featuring an interactive node-based cubic-bezier flowline canvas connecting classical philosophy and systems architecture.
- Developed an Administrative Operations Hub with live KPI telemetry (Gross Revenue, Order Fulfillment Pipeline, Low Stock Alerts) and full inventory CRUD operations.
- Implemented multi-criteria catalog filtering, slide-over shopping cart with promo discount logic, and simulated multi-step checkout.

EDUCATION & LEADERSHIP

Bachelor of Computer Applications (BCA) | Ganga Institute of Technology and Management

Graduated 2026

Leadership: National Cadet Corps (NCC) — Developed discipline, team leadership, crisis management, and cross-functional communication through structured national defense training.
