

DEEPAK KUMAR

Full Stack Developer (MERN)

Bahadurgarh, Haryana | +91 7404230481 | drai9813@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer skilled in React.js, Node.js, Express.js, and MongoDB, with hands-on experience integrating AI APIs into production features. Independently designed, built, and deployed a live client website end-to-end while working full-time. Comfortable across the MERN stack with a strong foundation in REST API design and responsive UI development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java (fundamentals)

Frontend: React.js, Redux, Vite, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, Firebase

AI / LLM Integration: Claude API, Prompt Engineering

Cloud & Tools: AWS (EC2, S3), Git, GitHub, VS Code

Currently Learning: TypeScript, PostgreSQL

PROJECTS

BIAN AI — AI-Powered Study Platform

2026

React.js, Node.js, Express.js, MongoDB, Firebase, Claude API | [Repository](#)

- Built a full-stack study platform that lets students upload PDFs and automatically generates flashcards and quizzes using the Claude API, supporting every academic subject and multiple languages.
- Designed the end-to-end pipeline: PDF upload and parsing, AI-driven content extraction, and dynamic flashcard/quiz generation with an interactive study interface.
- Implemented user authentication and subject-wise content organization, with a responsive React front end for use across devices.

Institute Website — Freelance Client Project | *San Brothers Corporate Solutions*

2026

React.js, REST API Integration, Responsive UI | [Live Site](#)

- Independently designed and developed a complete institute website end-to-end using React.js, from UI design through deployment, for a real paying client.
- Built responsive, user-friendly interfaces and integrated frontend components with backend APIs to deliver a fully functional live production site.
- Delivered the entire project solo while working full-time as a Data Entry Associate, managing client requirements and deadlines independently.

AI Task Agent

Planned

- *Recommended addition, not yet built:* a small AI agent (e.g., a Node.js/Express service using the Claude API with tool-use/function calling) that takes a natural-language task — like "summarize these 5 GitHub issues" or "draft a reply to this email" — and executes it against a real API. This is buildable with your current stack, is distinct from BIAN AI, and directly signals agentic AI-integration skills that are in high demand for 2026 full-stack roles.

Personal Portfolio Website

Personal Project

HTML5, CSS3, JavaScript | [Live Site](#)

- Built and deployed a fully responsive portfolio site showcasing projects, technical skills, and certifications.

EXPERIENCE

Data Entry Associate | *Uno Minda — Lighting Division*

Feb 2026 – May 2026

- Maintained high-accuracy operational and production records in a fast-paced industrial environment.
- Strengthened attention to detail, workflow management, and documentation practices under strict process standards.
- Collaborated cross-functionally with production and quality teams while independently developing and delivering a freelance client website (see Projects) during the same period.

EDUCATION

Bachelor of Computer Applications (BCA) | *Ganga Institute of Technology and Management*

2026

Graduated

- Leadership: National Cadet Corps (NCC) — developed leadership, discipline, and teamwork through structured training.
